

REACH FOR A HIGHER GROUND!

**WESTERN
ENTERPRISES**

Beginning right now, all other grounding devices are officially inferior. Western's Magnetic Activated Ground (MAG-450) is the top choice for welders.

Tested to handle 450 Amps @ 100% duty cycle, this unit also boasts one handed operation, 360° rotation around the electrode for improved placement, a built-in pipe boot for use inside and outside pipe, and dual built-in scrapers to clear rusty and painted surfaces for a better ground contact.

Never tack a tab to a surface for an alligator clamp again! Forget cup magnets that do not easily release or wipe clean! Don't settle for cheap imitations that handle less amps for the same price!

The MAG-450 is your ultimate grounding solution.

MAG-DISPLAY

Part #	Description
MAG-450	(1) 450 Amp Ground Clamp
MAG-DISPLAY	(6) MAG-450 Units, Countertop Display Box, Demonstration Plate, and (10) Brochures
MAG-KIT	Countertop Display Box, Demonstration Plate, and (10) Brochures
